We are motivated by the need to bring together constellation therapists and seekers with special interest in issues that are inherently confronted in the Indian subcontinent- the pain of India-Pakistan partition, restrictions imposed on women by the prevailing patriarchal practices, relevance of Indian classical teachings, and trans-generational trauma healing practices (Pitru Dosh) to name a few.

This symposium will bring you face to face with a number of facilitators, healers, therapists, and authors who have developed the art and science of constellation in their own unique ways and are willing to share in the true spirit of collective learning.

Experience Connection Cafes everyday. A space where we will create networks of collaborative dialogue around questions that matter to our work and our lives. In unique, interactive formats, you will be able to connect in smaller groups to other participants and have heartfelt conversations about your work, beliefs, and experiences.

Come with open minds and hearts and join in a 3 day journey where we together go deeper into understanding what makes us who we are, and what it takes to make us who we could be.
